A) Essay Writing

Task:1 Read the following essay written on Covid 19.

Covid-19

The coronavirus is a family of viruses that can cause mild to high health hazards in human beings. It could be like a common cold, a range of related illnesses and could become more severe like SARS- severe acute respiratory syndrome.

Causes: It is a pandemic disease. It spreads from one person to another very fast. When a sick person coughs, the droplets are sprayed almost 6 feet. It also spreads when one touches an infected surface or an object and touches the eyes, nose or mouth. It enters when we breathe in.

Symptoms: Mild to high fever, dry cough difficulty in breathing are the symptoms of this disease in severe cases it leads to pneumonia and multiple organ failure which are sometimes fatal (causes death). The incubation period is thought to be between 1 to 14 days.

Prevention and remedies: We know that prevention is better than cure. So, we should frequently wash our hands nicely with soap and water and sanitize our hands well with an alcohol-based sanitizer. We should maintain a minimum distance of 2 meter from one another in public places. We should protect our nose and mouth by wearing masks or face shields. We should disinfect all the surfaces objects which are touched often like door knobs, taps, sinks tables etc. It's our duty to follow the covid-19 rules strictly and create awareness among others.

In my opinion, we should avoid meeting people in groups and also shaking hands or hugging each other. Following the safety practices are very important for the sake of our loved ones. " Pandemic is not a word to use slightly all carelessly" let us unite and defeat this dreadful virus and this pandemic.
